

GUESS WHAT'S MISSING

What you need: a large tray or table covered with a selection of small objects

pen and paper for each person

Music requirements: None

Age suitability: 3+

Ask the children to have a good look at all the things on the tray and remember as many as they can. Ask the children to close their eyes tightly.

Remove one item from the tray. Ask the children to open their eyes again and see if they can guess what item is missing.

Keep playing removing one item each time until one item is left.

For older children or adults you can play the traditional version of this game when you cover the tray and each child or adult writes down as many items as they can remember.
